

PULSARS

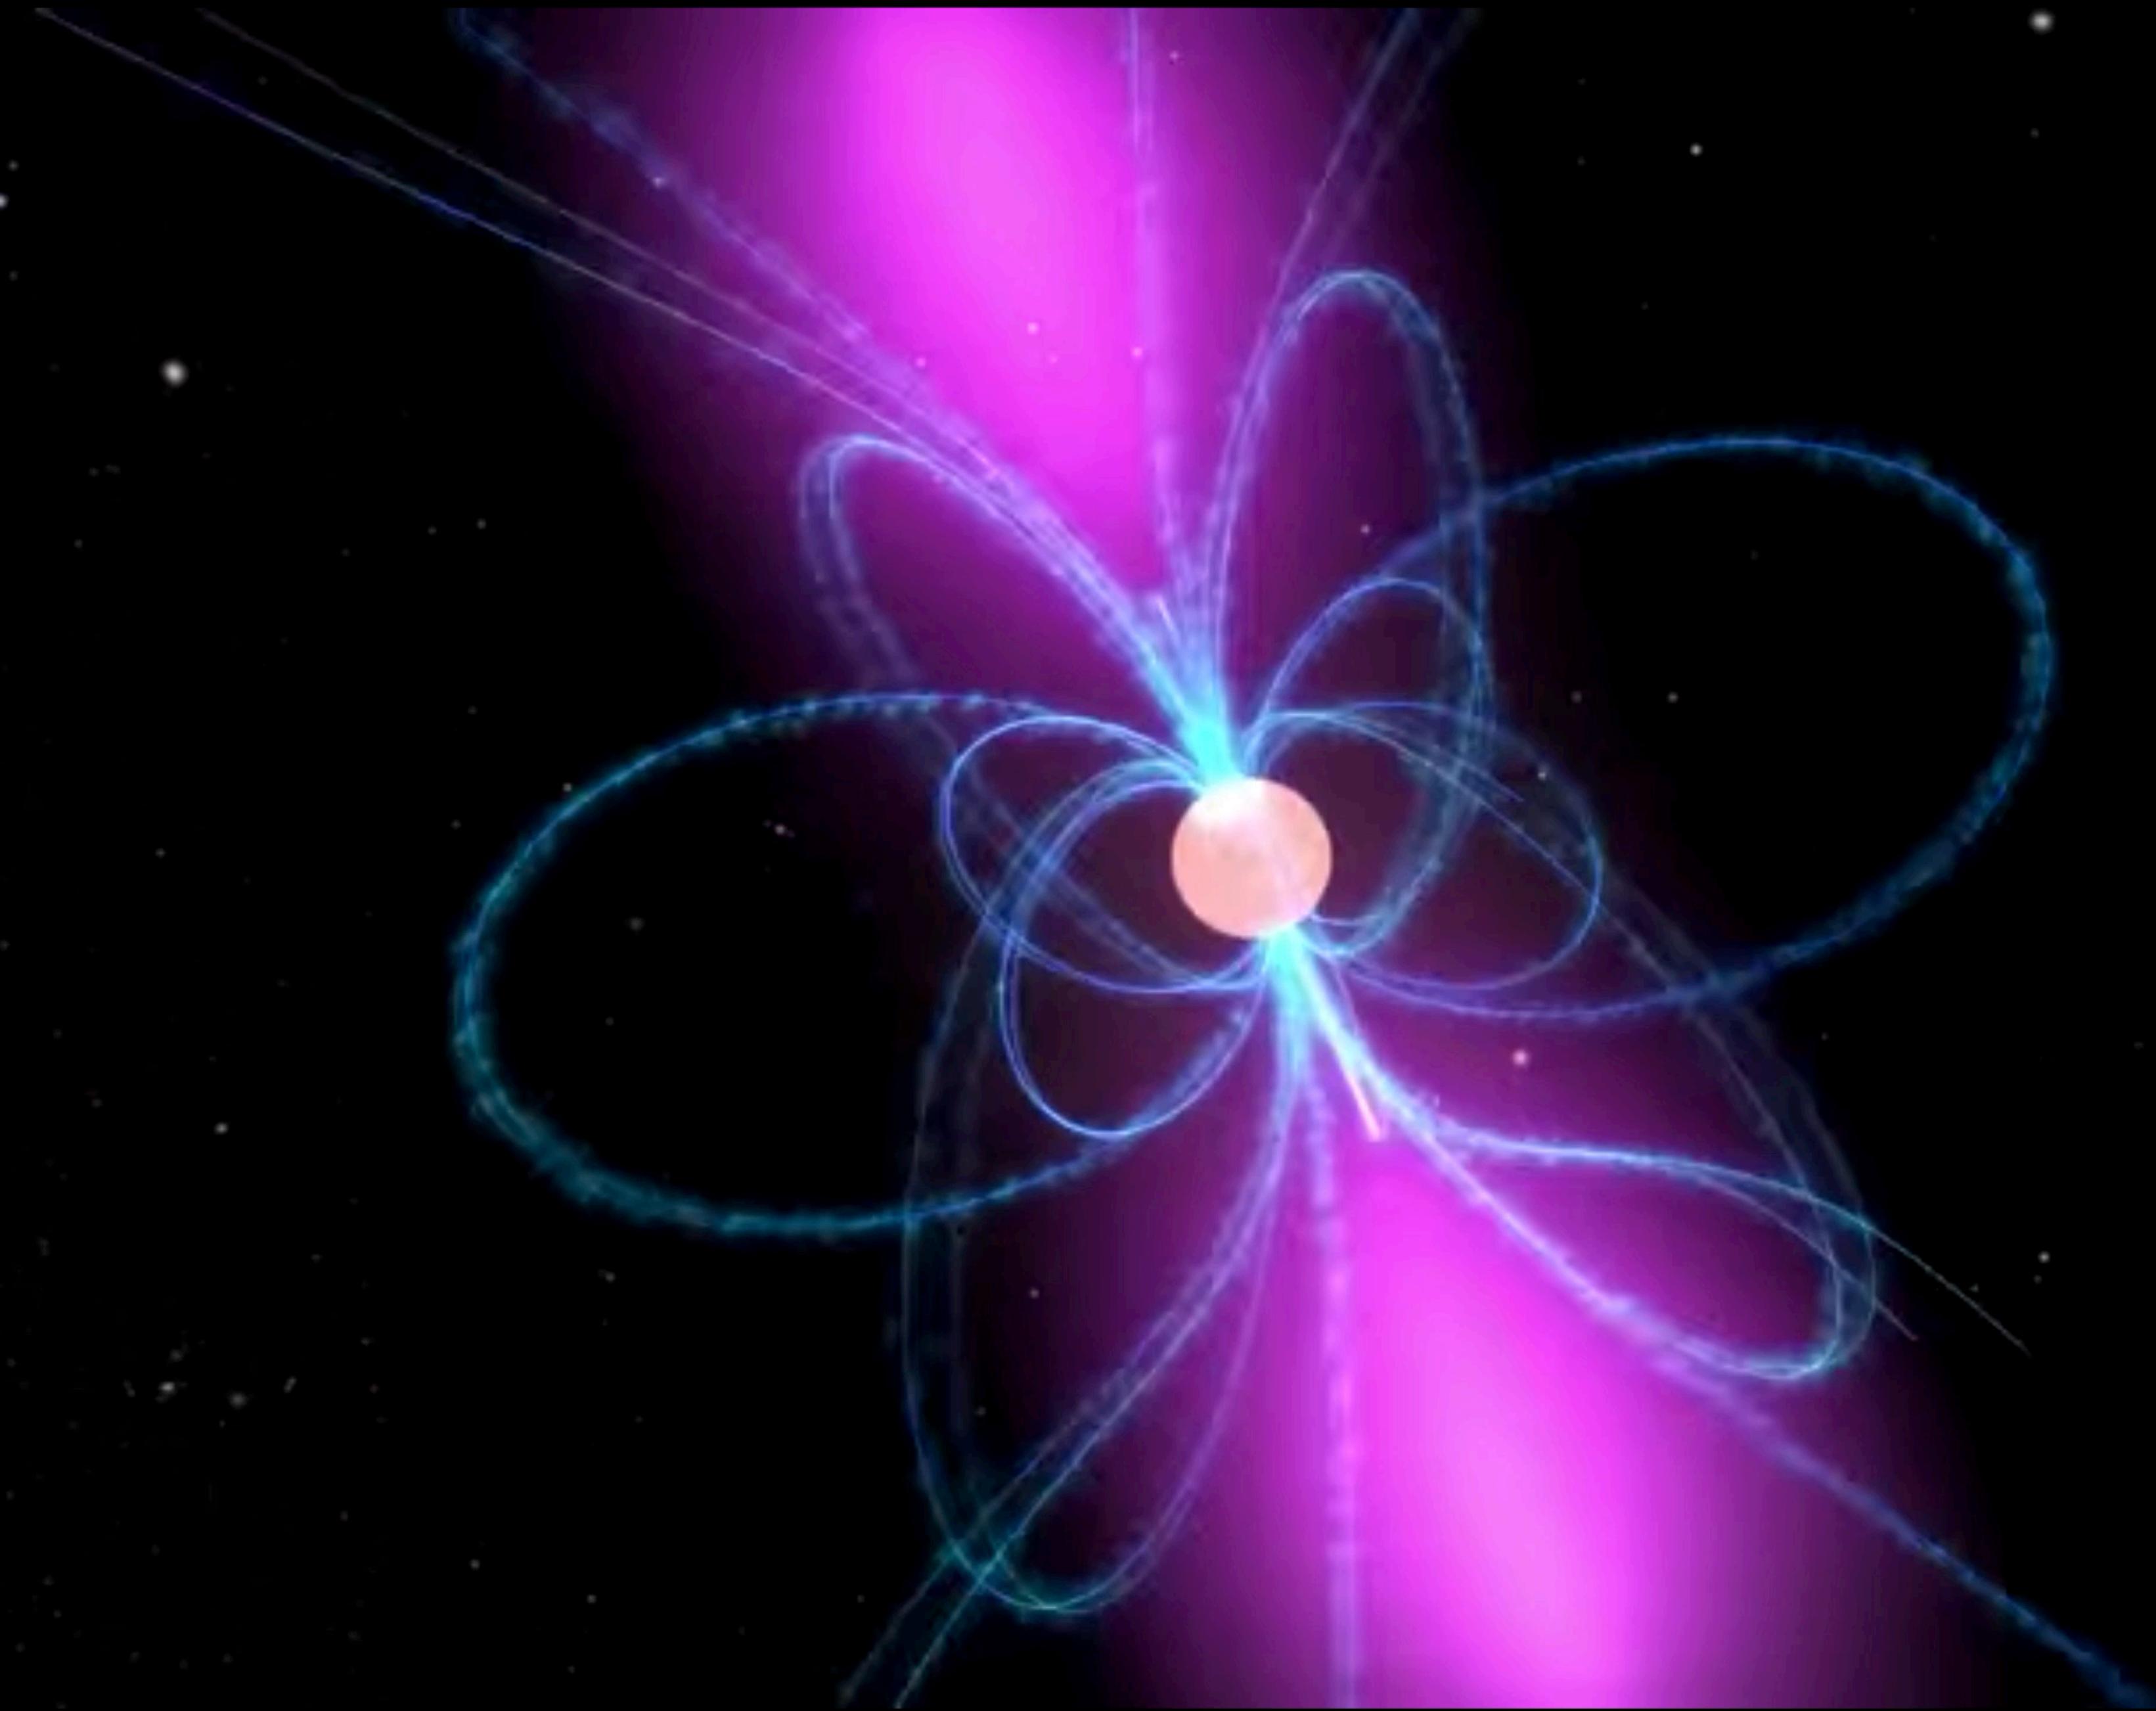

Detecting Dead Stars in Deep Space

by Ru Kein | February 2020

DETECTION

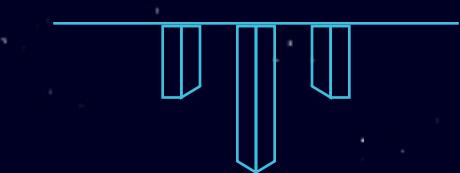

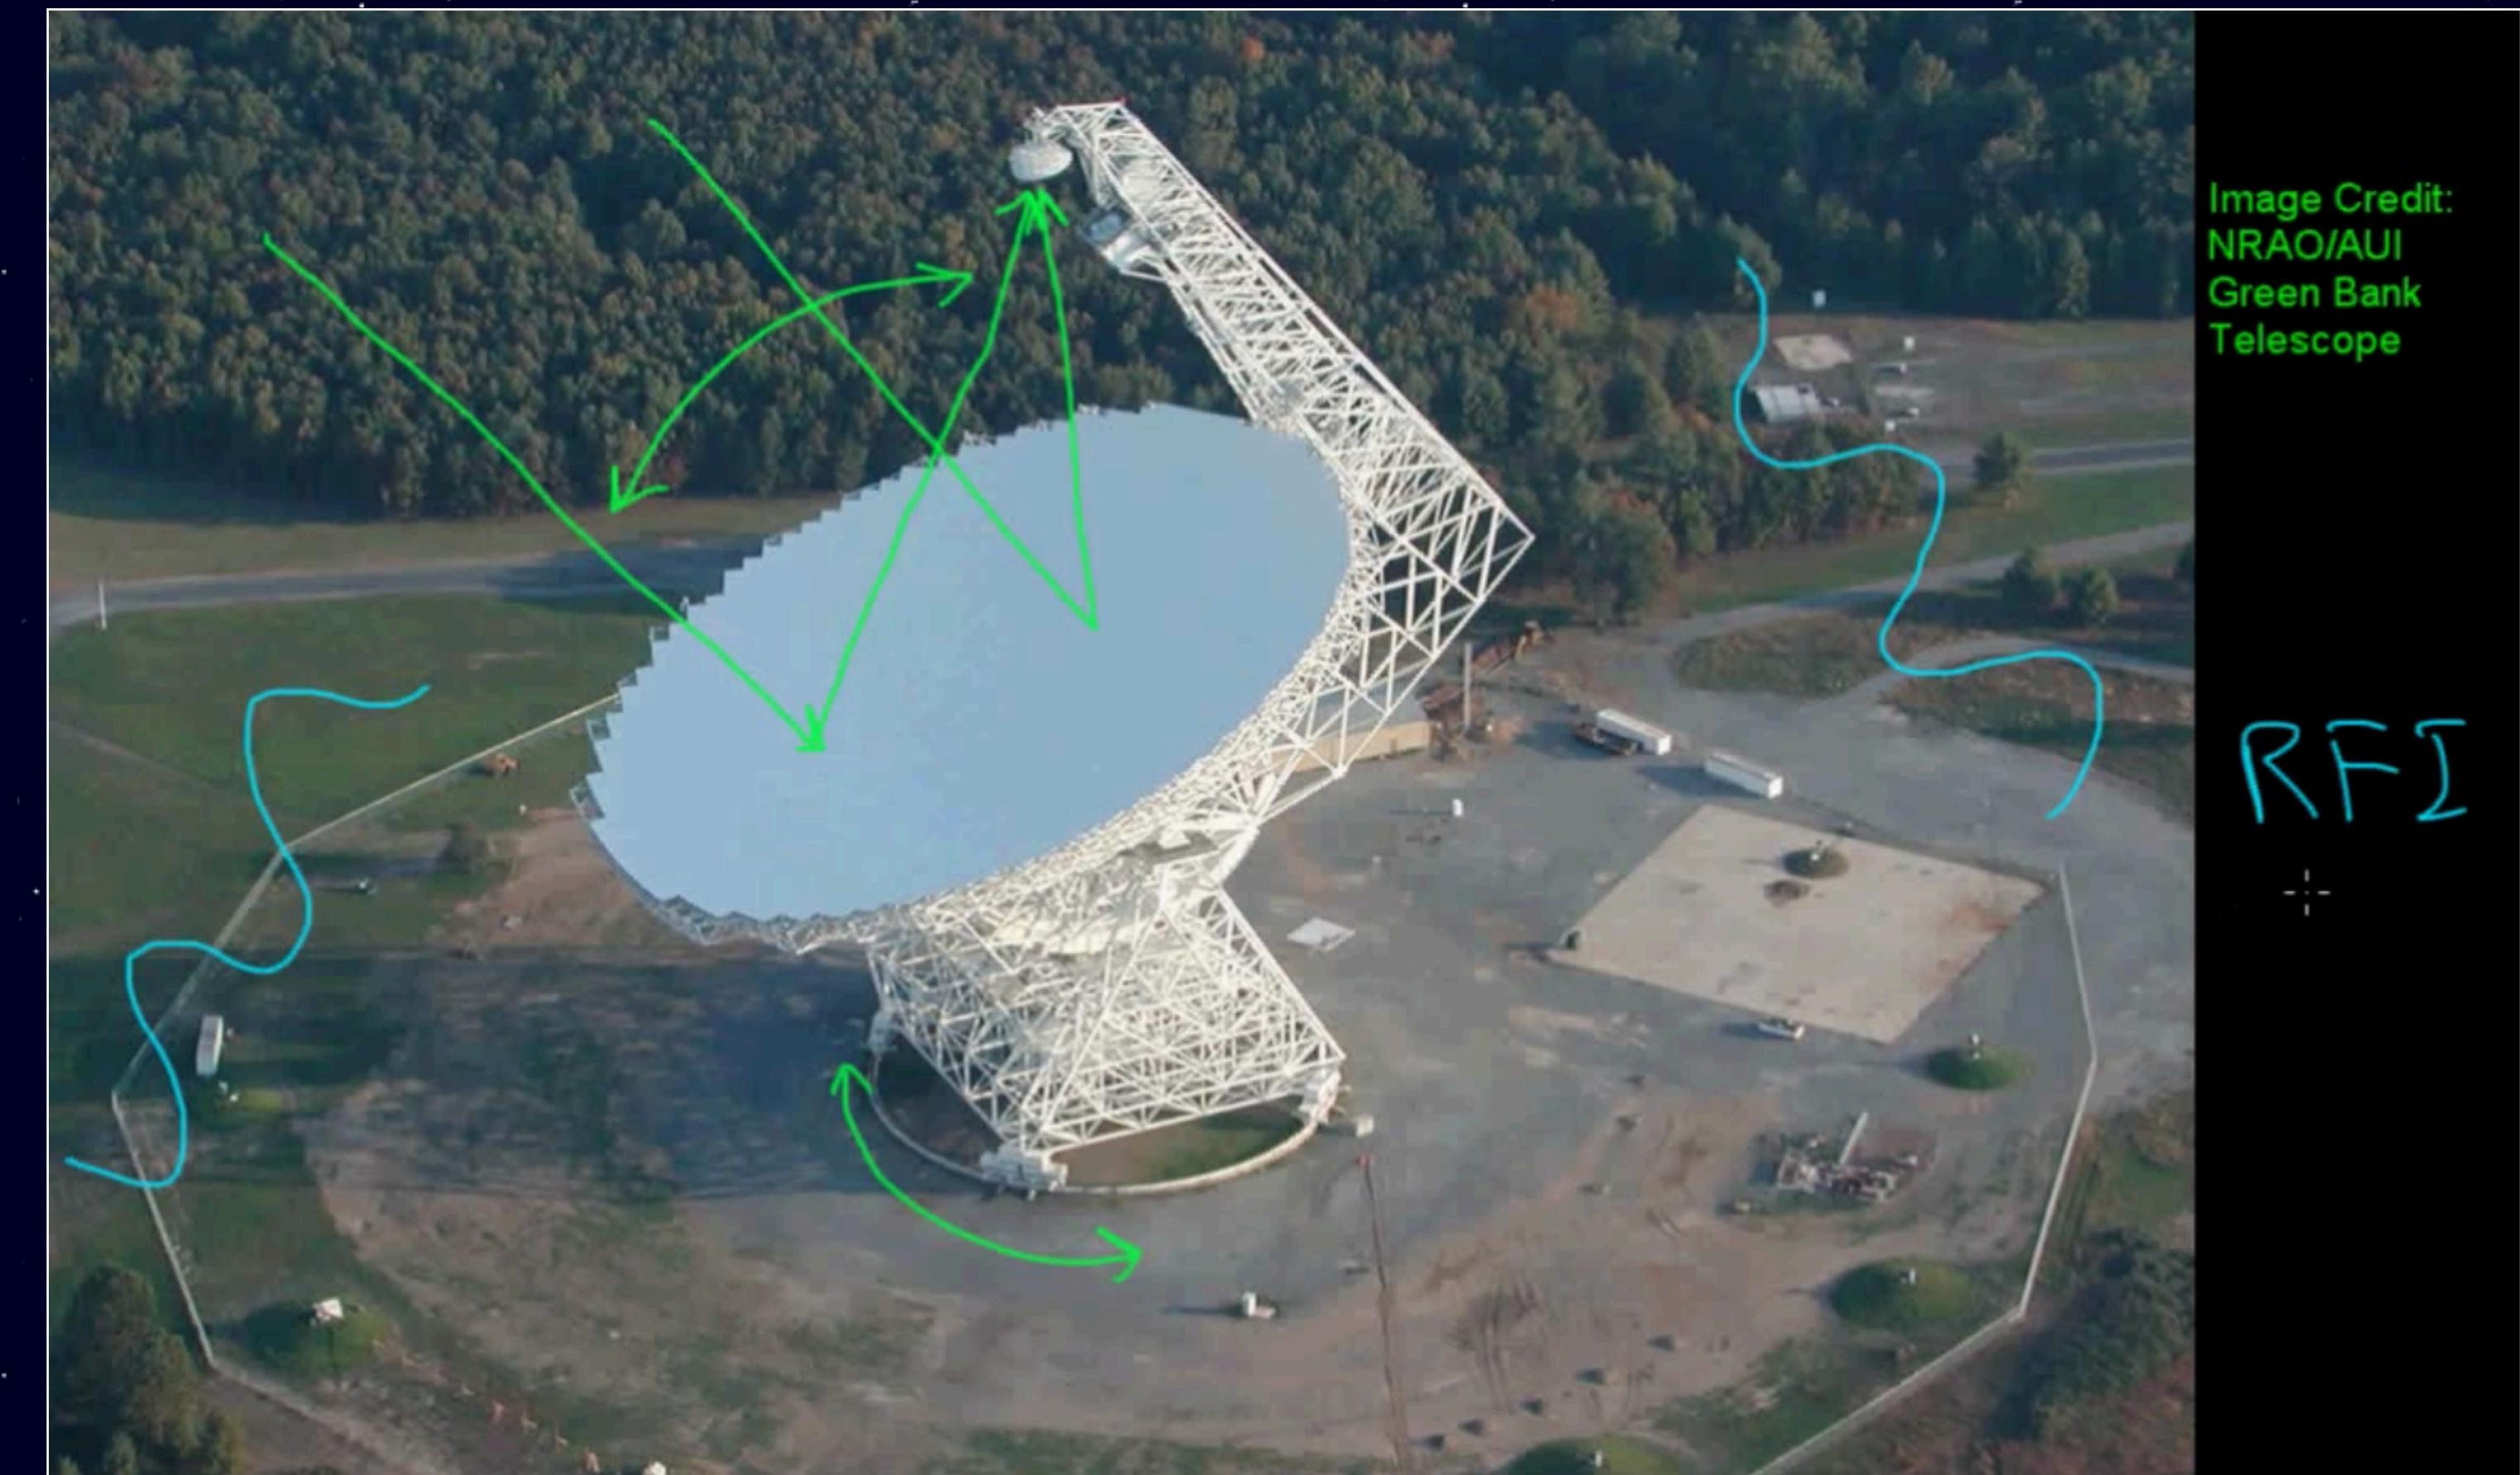

DETECTION

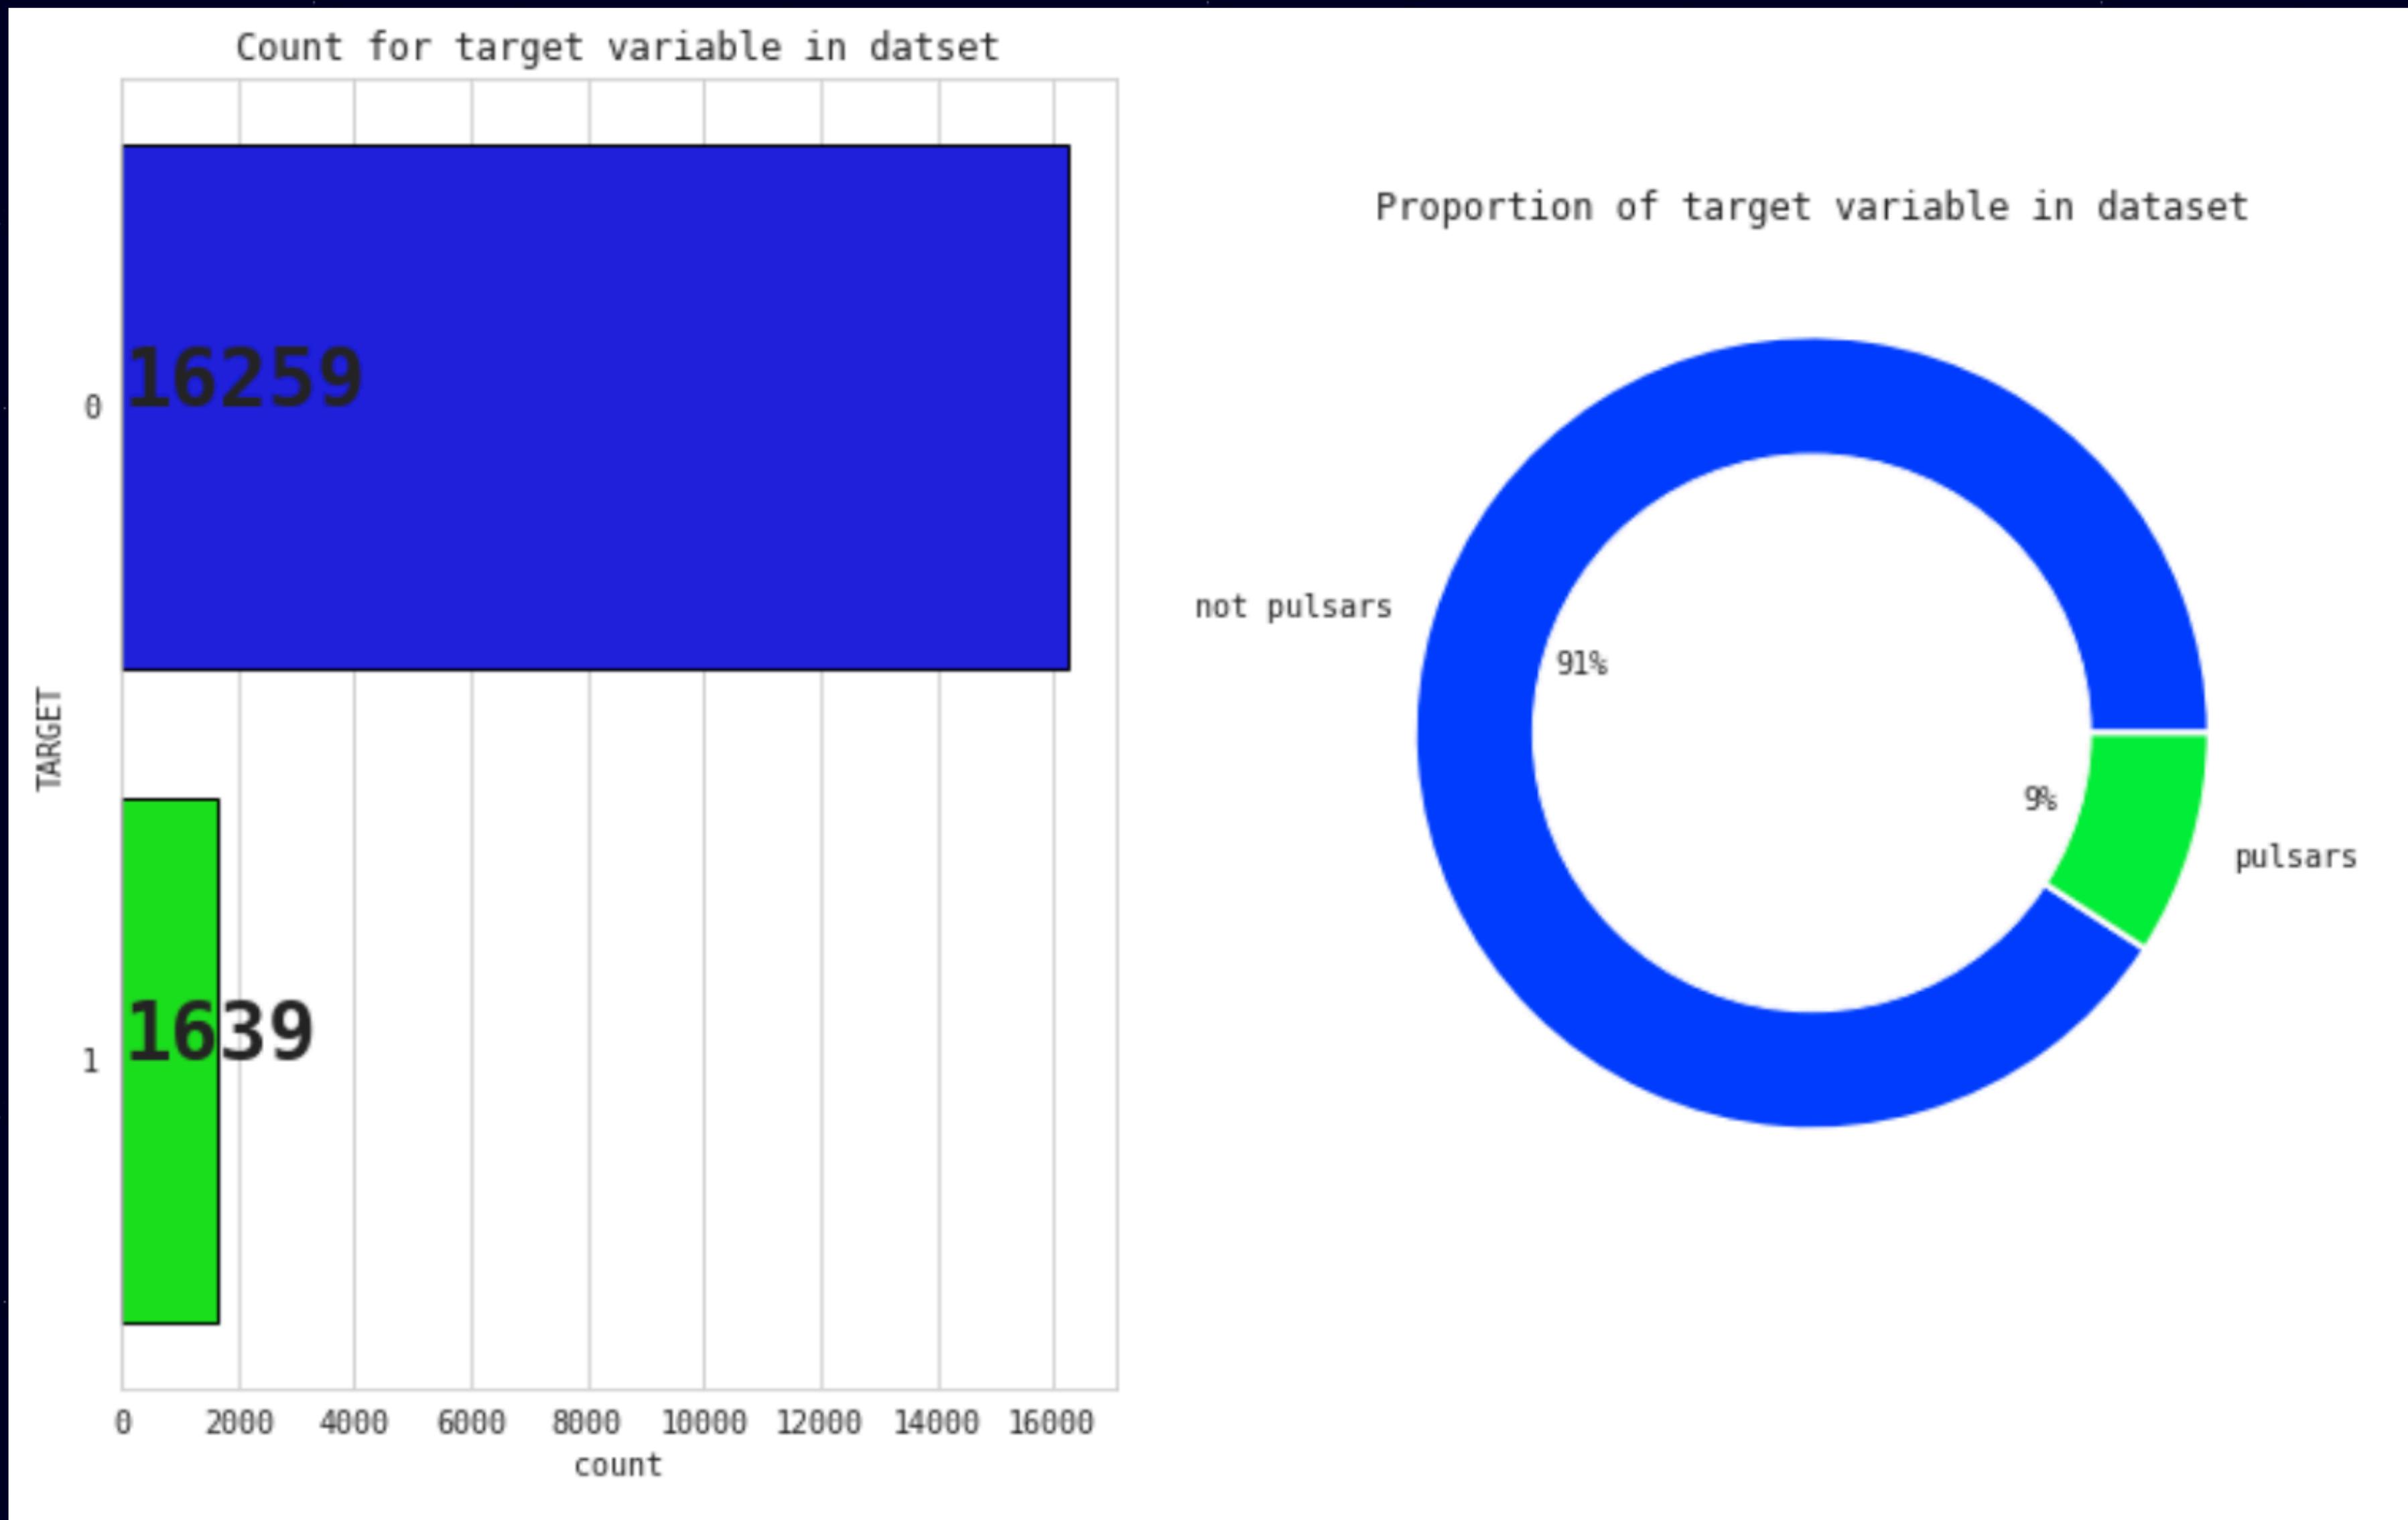

RFI

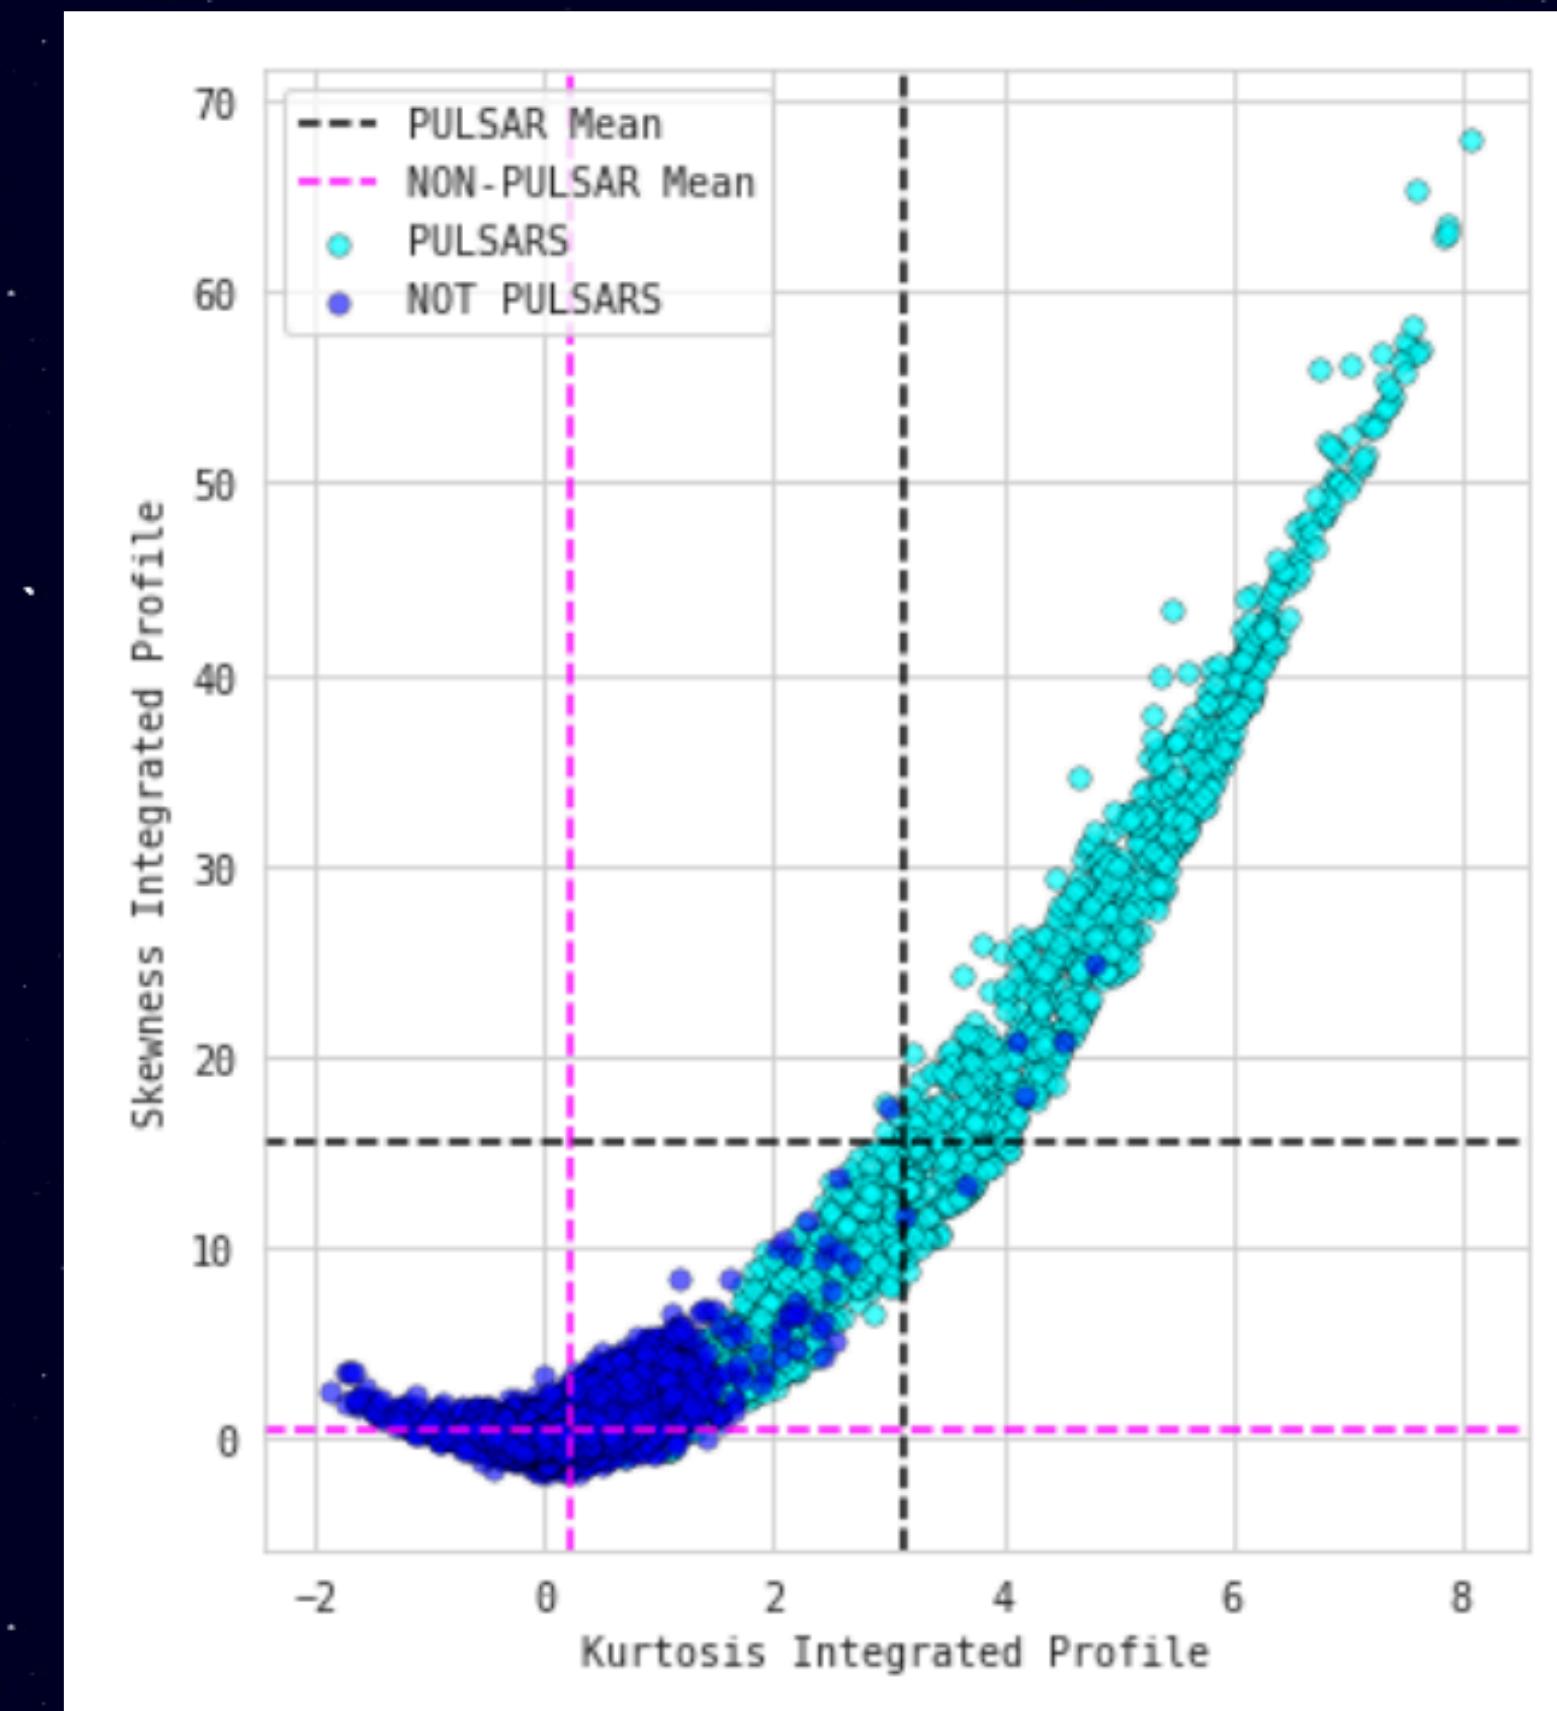

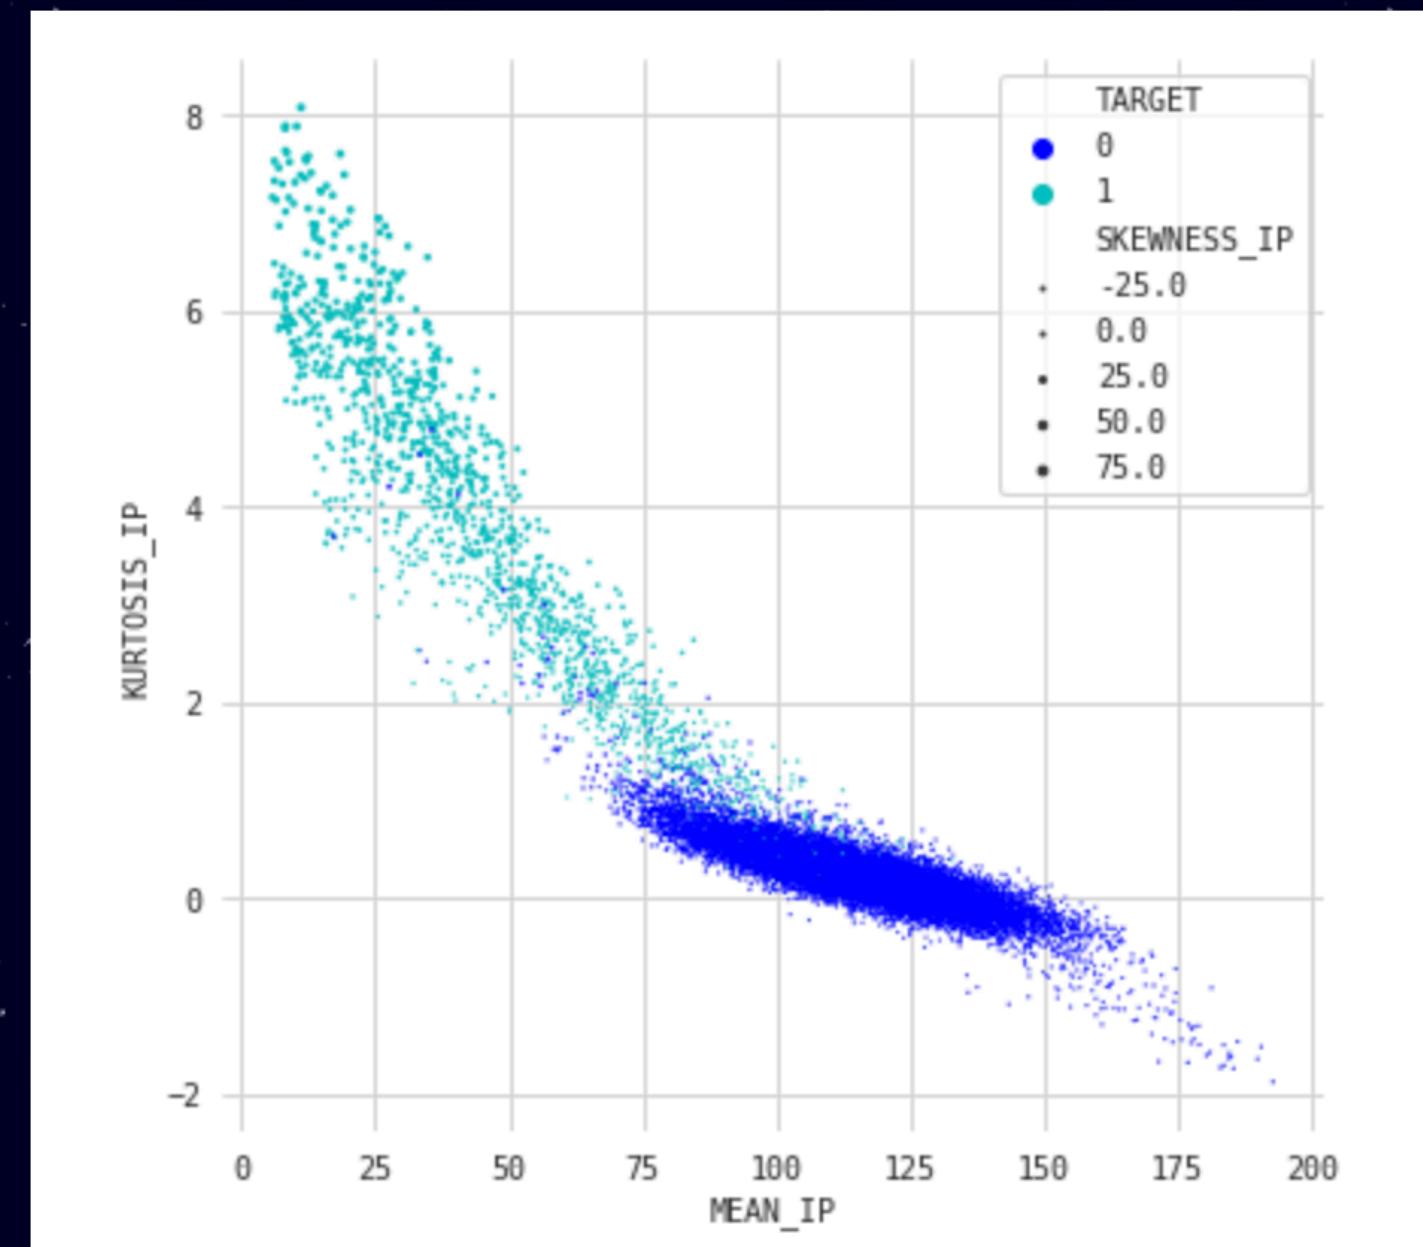

- **LOTS OF NOISE**
from radio frequency
interference (RFI)
makes analysis
difficult.

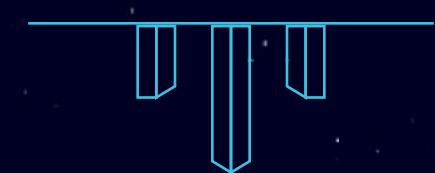

DATASET

- **17,898** total examples:
- **16,259** spurious examples caused by RFI/noise
- **1,639** real pulsar examples.

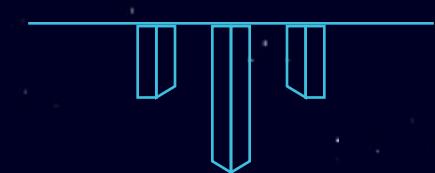

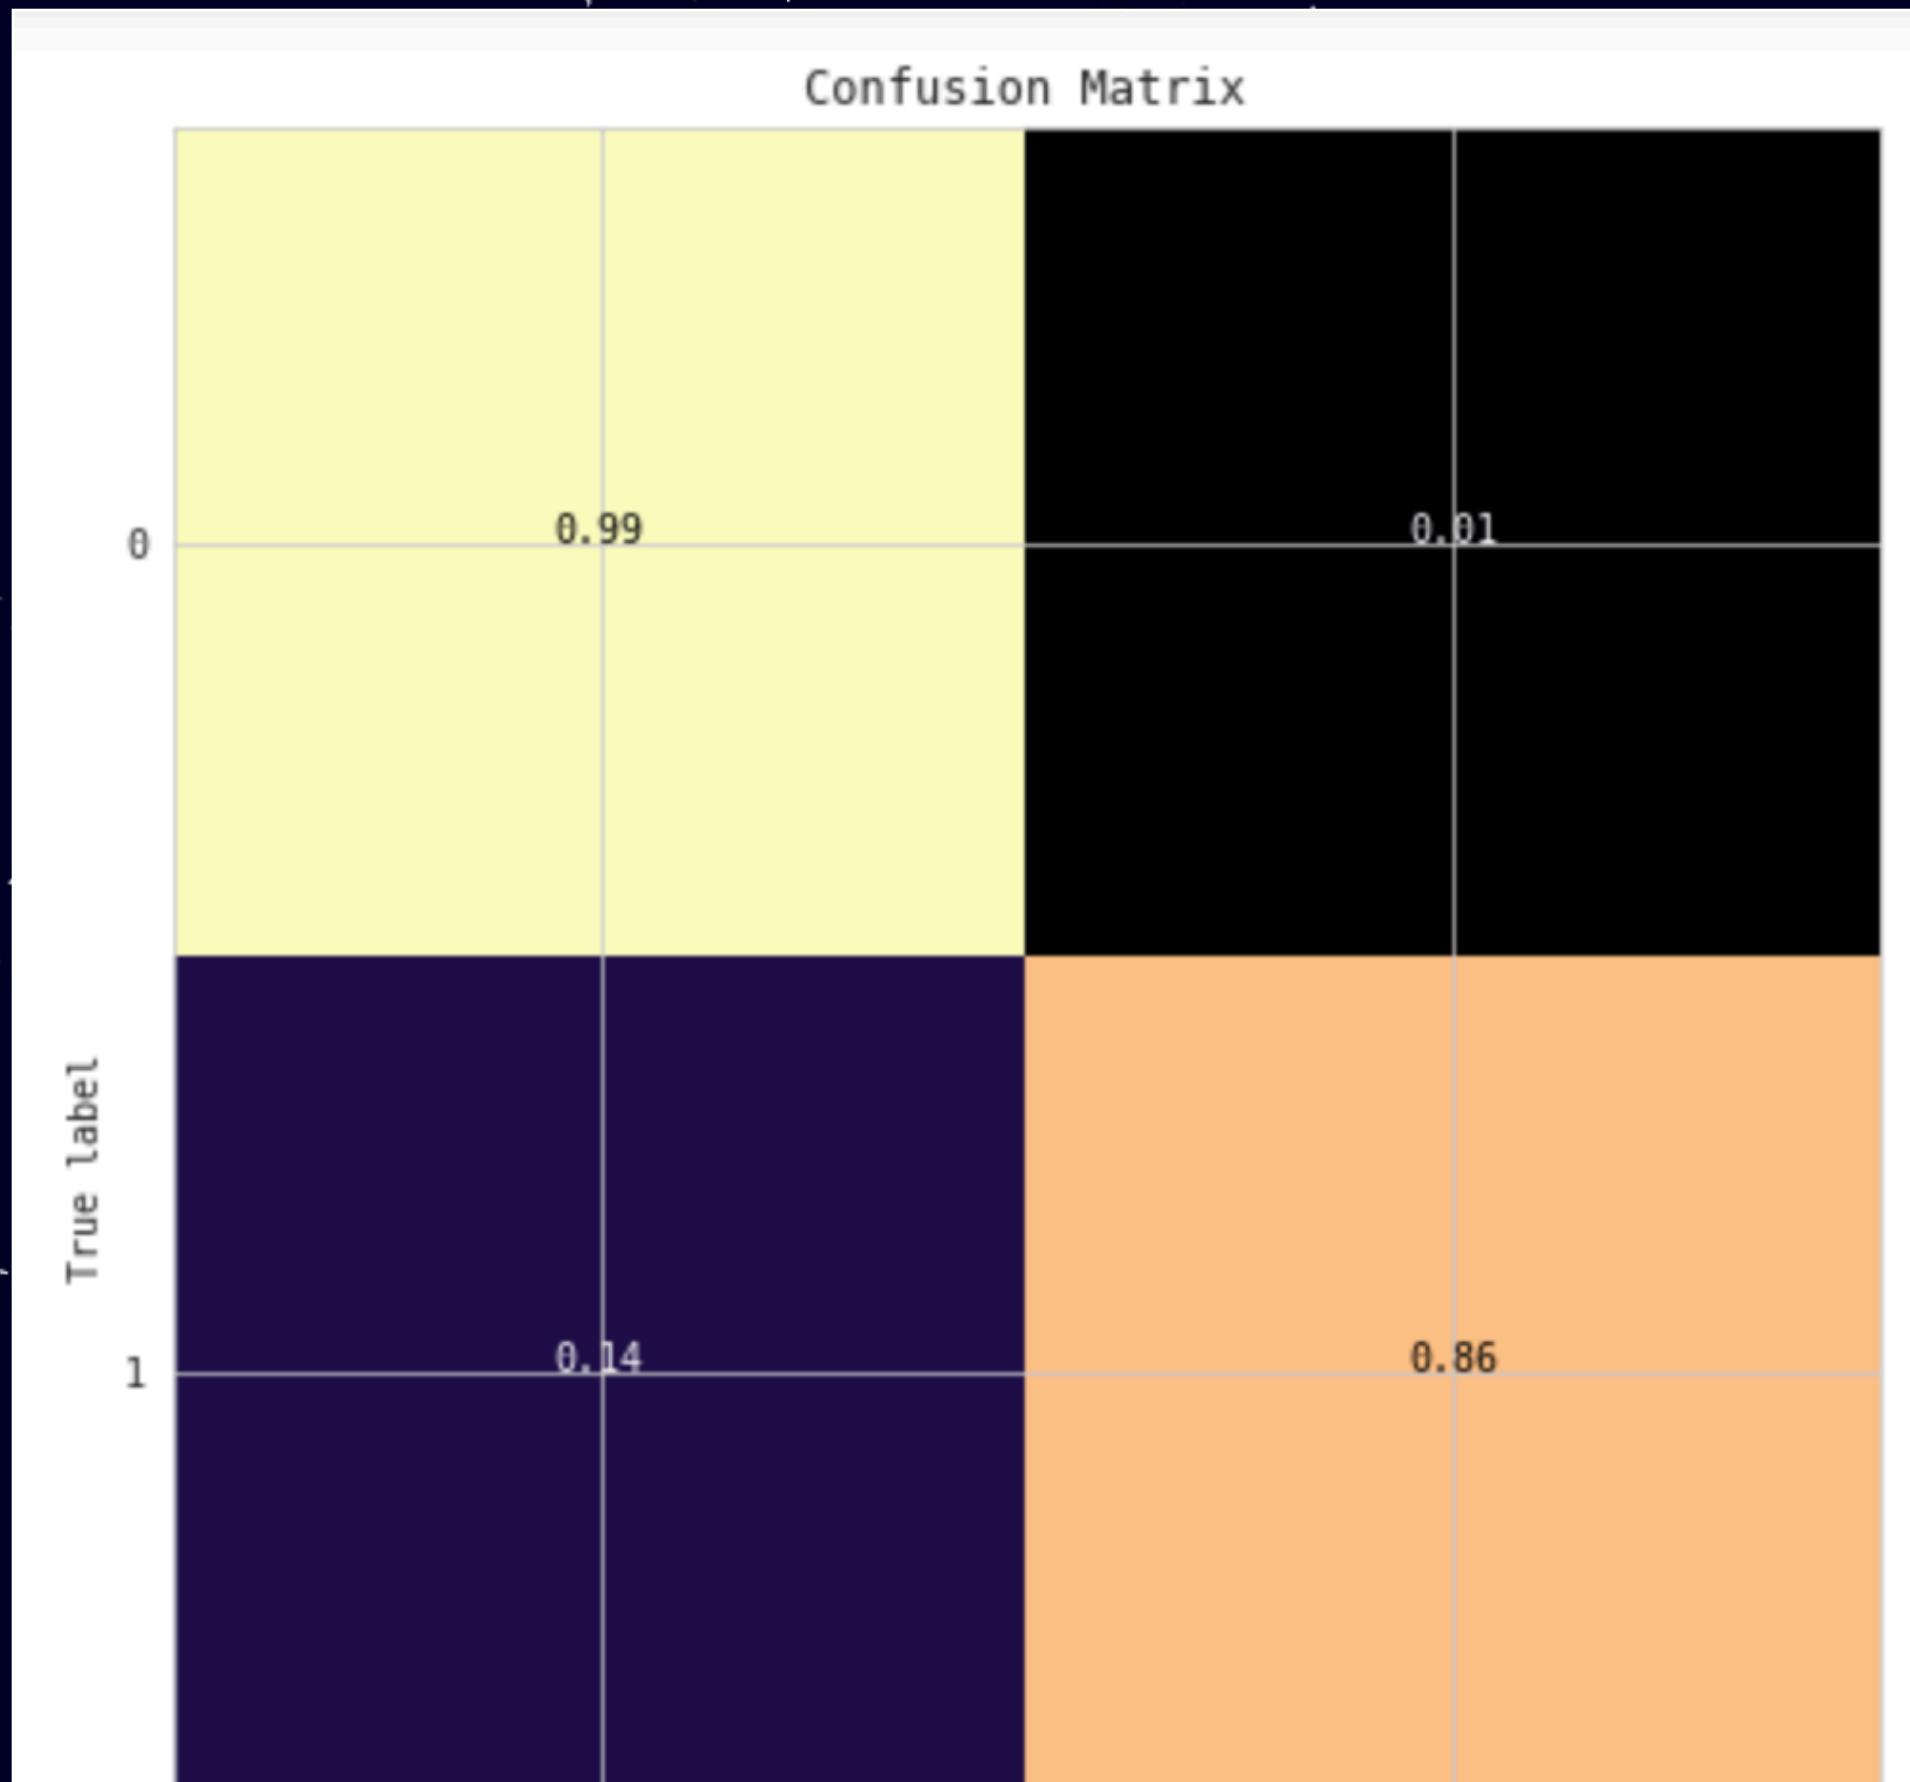

PULSARS VS NOISE

RESULTS

- Our model accuracy was 99%, with 1% False Negatives and 14% false positives.
- TOTAL PULSARS identified: 5,377
- TOTAL MISSED: 431

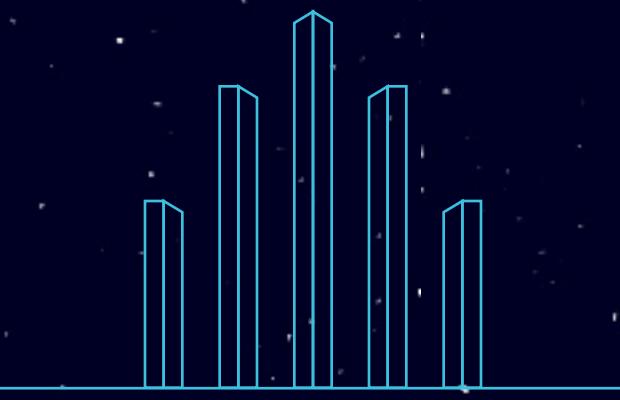

FUTURE WORK

Understanding more about black holes, anti-matter and our universe.

THANK YOU
